

**Dr.S.Kumarappa**

**Dean Examination**

It is with immense pleasure I welcome the young minds, the future of knowledgeable society, to Bapuji Institute of Engineering and Technology, an institution focused on imparting value based education integrated with academic education par excellence.

Our Institute becomes more and more responsive to the ever-changing needs of the students and the engineering profession. Students in BIET mean more than simply preparing for an exam or career; strive to produce manpower who can contribute to the growth of nation. Institute offers not only academic pursuits but a wide range of social, cultural and recreation activities. Our Institute vision is to become the center of excellence. It is true that quality is achieved only with creating excellence in work, work environment, human resources, etc.

The various programs have grown significantly with each subsequent semester where examination is an important and essential phase. To express one's knowledge of subject by various methods of examinations such as the assessment through class room participations, term papers, class tests, tutorials, group discussion, etc. Along with this it is also important for student to exhibit good study habits, cooperative attitude, attentive and hardworking habits, logical and rational thinking and open-mindedness. Our students are not only future alumni, but they will take the knowledge and vision of excellence gained from here to manifest as their own, which will have a unique impact on society. We are proud of the progress of our students and in future shall continue to provide

knowledge, skills and competencies specifically required in the field of higher education.

For any official examination related circulars/notifications I advice the students to visit [www.vtu.ac.in](http://www.vtu.ac.in) and also college notice board only.

I take this opportunity to extend my heartiest wishes to all the students to achieve success in campus and future career initiatives.
