

Welcome to the Centre of Innovation and Incubation of BIET.

New ideas for innovation grow out of the minds of each new generation. Having an institution of higher learning that can help the young generation to put those ideas into action is critical. Innovation in BIET is given an utmost importance and is regarded as one of the most important activities besides teaching and learning. The institution with good infrastructure, dedicated & qualified faculty, moderate research facilities and supportive management provides an excellent ambience for entrepreneurship. Innovation circles, mentored by Dean – Innovation Cell, senior faculty members are active and are primarily responsible for cultivating entrepreneurship culture in students and faculty. Currently, BIET has an active program called New Age Innovation Network (NAIN) supported by KITS, Dept. of IT, BT, Science & Technology, Govt. of Karnataka. This Post-Pandemic has brought a new paradigm, the new normal is being predicted as the new social order. The need-driven technological innovations seem to be coming to address the new challenges of the changing world. The aim is to create job providers who will have the potential of becoming the future innovators and industry stalwarts and who will further propagate innovative culture.

I wish all the Innovators the best in their upcoming endeavours

Dr. Vinutha H P

Dean – Innovation Cell
