12.	Scope / Objectives of the project:	<p>a. To apply suitable pre-processing and segmentation techniques on the collected dataset.</p> <p>b. To identify prominent features and extracting them for further processing.</p> <p>c. To develop a model that will recognize the subject.</p>	
13.	Methodology of work: (Including diagram, flow chart and design calculations)		

14.	Expected outcome of the Project	A GUI having two divisions in which one is displaying the video input and another one displaying transformed silhouettes. Also it has buttons which has different functionality, such as: - adding new subject, training the model with new subject and compare.						
15.	Application Of the Project	The main application of this project is to make a robust Biometric Surveillance system .						
16.	Budget Details with Material Required	1. Report Printing and Binding: Rs. 1000/- 2. Online Web service: Rs. 2000/- 3. Hardware components: Rs. 2000/- 4. Miscellaneous: Rs. 500/- Total Amount: Rs. 5500/-						
17.	Date of commencement of the Project	06-01-2021						
18.	Probable date of completion of the project	05-07-2021						
19.	Duration of project work	6 months						
20.	Pert chart for completion of the project in said duration as per planned activities:							
	SI .No	Activities Planned	1Month	2Month / Week	3Month /Week	4Month / Week	5Month /Week	6Month / Week
	01	Literature review						
	02	Planning/ Designing						
	03	Assembly/ Fabrication Work						
	04	Final Testing						
	05	Result& Calculation/ Conclusion						
	06	Preparation Of Report & Submission						

DECLARATION BY THE STUDENTS

We, the project group members hereby declare that the details enclosed in the project proposal are true and correct to the best of our knowledge. If any changes there in the project title, students name will be intimated immediately. In case, any of the above information is found to be false or untrue or misleading, we are aware that we may be held liable for it.

13.	Scope / Objectives of the project:	<p>The main goal of this project is to come up with the solution which will leverage the power of deep learning image classification behind the scenes and help in recognizing the criminal's face accurately with the following functionalities:</p> <ol style="list-style-type: none">1. To develop a model to predict a face-sketch of a criminal with high accuracy.2. To apply supervised machine learning method to the model to achieve precise matching.

14.

Methodology of work: (Including diagram, flow chart and design calculations)

The proposed face sketch recognition approach has four main modules for image acquisition, module for extraction of features, module for training classifier database, and module for classification. Initially, the face datasets are collected by the image acquisition module.

Then, a series of salient features are extracted by applying feature extraction module. These facial features are used to analyze face landmarks which represent human identity information. In the next process, the classifier is trained for recognizing the face. In the last module, the system recognizes face image and fetch information about the person from the database.

Model Design

The six stages are:

- Data gathering of face images of subjects.
- Pre-processing of face images i.e., cropping, grayscale conversion.
- Feature extraction of the sketch image using Pattern Based Algorithm.
- Discrete Cosine Transform (2D - DCT) image compression of face image classes.
- Training the sketch images from the mugshot dataset using SVM, a supervised Machine Learning Algorithm.
- Testing and validation of the program and technique.

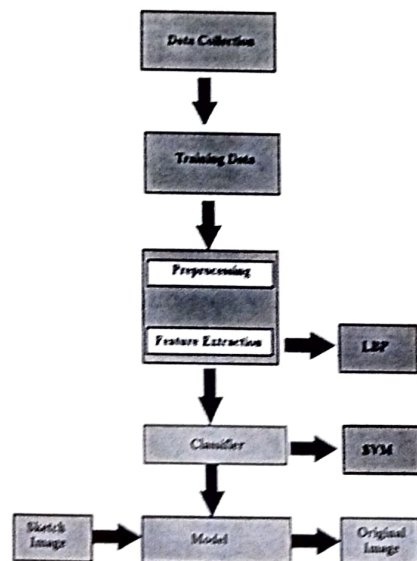

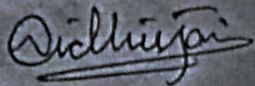

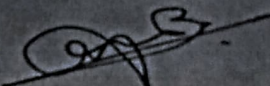

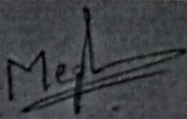

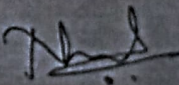

Fig 4.1: Flow Diagram

15.	Expected outcome of the Project	The project focuses on developing a technique that provides a solution for an efficient face sketch identification system in forensic applications. The digital image mug-shot is considered to be used as an original face image and the corresponding sketches of different faces is considered to be drawn by a forensic artist. Here some specific facial geometric feature which could be used to calculate some ratio of similarities from the template photograph database against the forensic sketch.														
16.	Application of the Project	Face recognition is commonly used in applications such as human-machine interfaces, automatic access control systems and forensic investigations etc. which involves comparing a face image with a database of stored faces in order to identify the face in the image. Forensic sketches play an important role in criminal identification process. These sketches are drawn by forensic artists on the basis of the description provided by an eyewitness or victim. These sketches are publicized to get some clues to reveal the identity of the criminals. A faster way to identify the criminals is to match the forensic sketch with some mug-shot database. In the process of drawing a sketch, the description provided by the eyewitness often includes some unique facial details comprising the deviations from an average face. This project involves the design and development of a face sketch identification system.

Dear Sir/Madam,

Sub: Sanction of Student Project from the institute for the year 2018-19

Reference: Project Proposal titled: **"Identification of Personal Traits using Signatures"**

I am happy to inform that your project proposal referred above, has been recommended by the Projects Evaluation Committee of BIET and approved by the Principal under student project scheme. Budgetary break-up as detailed below.

Students	NadiraKhanum Vaibhavi N V Sadvini S L Puja Kumari	Budget	Amount
		Materials/consumables	6000/-
Guide/s	Dr. Pradeep N	Travel and Report Preparation	
Department	Computer Science and Engineering	Miscellaneous	
Rupees Six thousand only		Total	6000/-

The following are the guidelines to carry out the project work:

- The project should be performed based on the objectives of the proposal presented.
- The project should be completed in all respects and one copy of the hardbound report along with softcopy of the full report in a CD (.doc and .pdf format) should be submitted to the head of the department concerned / Dean R and D.

The sanctioned amount can be collected from the institute by submitting proper bills of expenditure, duly signed by Head of the department and Principal.

Yours sincerely,

Dean R&D

Director

Principal
