Abstract:

As green indicates prosperous so is green environment healthy environment. Human needs healthy and reliable environment to live. And today man has done enormous hazard to our environment. At this point, education plays a very important mission. Because it is possible to change people's behavior and perspectives positively through education. For the creation of awareness about the importance of protecting environment in society, faculties and students are of great importance. Universities are the apex bodies in higher education system and can provide environmental education through their curricular design and research.

Introduction

Today, the human society is facing severe environmental problems like climate change, greenhouse effect, depletion of natural resources, pollution of air, water, soil, etc. The ever increasing population and changing life styles are the reasons for the environmental problems. The time has come to protect the natural environment through our precise efforts.

Faculties have to take an important responsibility. They are very important because they direct the society with the students they raised. If teacher candidates are given environmental awareness, they will transfer this awareness to their students when they begin working.

Students life should not be concerned to only Academics. It's also important for one's life to maintain a good environment in surroundings. To accomplish such kind of environment, its essential to take a step forward and bring some volunteers work among the students.

Bapuji Institution is one of the significant education institution located in Davanagere. The greenery campus is spread over an area of 63 acres provides the state of art infrastructure and facilities. Our Institution always gives importance to protect our nature by conducting the programs on environmental awareness.

Role of Faculties:

As environmental sustainability is becoming an increasingly important issue for the world, the role of institutions in relation to environmental sustainability initiatives is becoming more and more prevalent. Every university is unique and has its own traditions, culture and geographical area. They are familiar with their surroundings. They can use their existing knowledge and trained man power to address problems and issues concerned at the local level. Faculties can help to establish the sustainable development through Teaching programs, Research,etc.

Role of Students:

Students need to promote the plantation in surrounding areas. The volunteer students can start planting some useful plants and may the faculty can look after and guide to the students. It makes the campus to look beautiful and also it keep's the environment safe.

Conclusion:

As environmental disasters occur with increasing frequency, their impact also grows more severe. There are two kinds of environmental disasters: man made or human induced and natural. The aim is to make people protect the environment they live in. Raising teacher candidates for that purpose in Faculty of Education will change the viewpoint of the society in a positive way. That is because, the children who are sent to schools and are raised with nature love, will enlighten many environmental problems as the parents or individuals of the future. In this way a society which consists of individuals having sustainable environmental awareness will be obtained and future generations will be enabled to live in a safer environment.
