

Bharath H C

Software Engineer | Technical Consultant | Python developer |

bharathhonnali@gmail.com | +91-9449930921

PROFILE

A software engineer and Machine Learning Engineer with 4 years 6 months of hands-on programming. Proficient in a wide range of programming languages, engineering and data science frameworks, cloud computing platforms, and staying up to date on emerging technologies.

EDUCATION

BIET Engineering College, Davangere

M.tech in Computer Science and Engineering, 2017

BDT College of Engineering, Davangere

BE in Computer Science and Engineering, 2015

SKILLS

Languages: Python, Basic ML and SQL.

Server-side Frameworks: Django

Data Science/ML Stack: Scikit-learn, Pandas, Numpy, Matplotlib, Seaborn, Jupyter

Database Systems: MySQL, SQLite3.

Deployment: Git

EXPERIENCES

Acranton Technologies Pvt. Ltd | *Software engineer/ Python Developer /Technical Consultant*

March 2018-Present

- Building, training and evaluating classification and regression predictive models using Linear and Logistic Regression, Random Forest, K-means clustering and Neural Nets.
- Building 30+ Innovative python based student projects under Machine Learning, Deep Learning and IOT domains.
- Worked as Internship Trainee for more than 150 students among different colleges under machine learning, IOT and Data analysis domains.
- Worked as Technical Trainer for Python, ML and IOT.
- 2 years in ML.
- 4 years in Pandas, Numpy, Matplotlib, Scikit-learn and Opencv

Freelancing | *Python developer / Programming consultant*

July 2015-2018

- During my career as a freelancer, I worked with very interesting projects. This allowed me to gain better understanding on important concepts of Web, Python and ML.

I am not limited by technology. I am open to learn new programming and tool. Possessing a professionalism, good team spirit, deadline orientated and having the ability to organize and present complex solutions clearly and accurately.
